CUS 1172 – Web Application Development
Assignment Submission Cover page

Student Name: Antonios F. Takos
Assignment: Assignment 01- Milestone 01

Work Description

The project directive was to create a concise profile site using basic HTML and deploying it using GitHub pages. The sections included (in no particular order)

- Name
- Education (with brief description)
- Work Experience
- Programming Skills
- General Interests & Hobbies
- Favorite Media
- Favorite Website
- Projects

One part I had trouble with was embedding one of the YouTube videos, as many of them had a filter that did not allow them to play in an embedded format.

In addition to what was specified for the portion of the project, I implemented some light CSS (within in the HTML as opposed to in a separate file) and section tags.

Deliverables

GitHub Repository:
